

# McLaren – P1 GTR

P1 GTR

GTR . The name alone suggests how significant the car is - the first McLaren to use the GTR moniker was the F1 GTR that won the 1995 Le Mans 24 Hours.

Without road-car regulations to hold it back, the P1™ GTR pushes everything to the limit. Available only to P1™ owners, production of the track-focused GTR began upon completion of the 375th and final road car. The mid-mounted powerplant has an output of 1,000PS (986bhp) and includes an ERS-style push-to-pass system. The large fixed rear wing features a Formula 1™-derived Drag Reduction System and the wing mirrors have been repositioned to the A pillars to put them closer to the eye line of the driver and reduce aerodynamic drag. The car sits at a fixed ride height on race-prepared suspension over 19-inch motorsport alloy wheels. Below the rear wing is the exposed, centrally mounted inconel and titanium alloy exhaust. This all new straight cut twin pipe design has been developed exclusively for the GTR. The steering wheel comes from the Formula one MP4-23.

We’re offering one of 58 produced cars, out of which 35 cars have been converted to street legal versions. So this is one of the 23 remaining cars without aftermarket modifications. Nevertheless we are also able to offer you a street conversation if wished, we are happy to answer your questions on that.

This P1 GTR is accident free and fully maintained, a large service has just been made at McLaren.

The complete package includes:
McLaren Diagnostic Computer
McLaren Charger
additional Wheelset with new tires
additional Tireset (Slick)
Indoor CarCover
Outdoor CarCover
